Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-57, drawn to recombinant nucleic acids encoding AAV rep and cap proteins from different AAV serotypes, recombinant AAV virions and vector libraries comprising vectors comprising said sequences encoding said rep and cap proteins, classified in class 435, subclass 320.1.
- II. Claims 58-78, drawn to a method of mutating nucleic acid sequences encoding AAV cap proteins so as to generate a plurality of mutant sequences, placing said mutants into vectors to form a plurality of vectors and introducing said vectors into host cells, classified in class 435, subclass 456.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions involve AAV virions and vector libraries comprising AAV cap sequences from different serotypes (Group I) and a method of mutating AAV cap sequences so as to generate vector libraries comprising mutated AAV virions. The compositions of Group I do not require the method of Group II for their manufacture and the method of Group II can be used to generate products distinct from the compositions of Group I. Each of the Groups is capable of supporting a separate

patent and a search of each would not be co-extensive with a search of the other and hence would be burdensome.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
